

Brian Kingsbury (he/him)

UX Developer

Experience

Johnson Controls

Senior UI/UX Developer

March 2023 - January 2025

- Researched and chose direction of new design system, pitched it to design and development managers
- Developed component library using custom built web components
- Packaged up system components for web components, Angular, and React
- Built custom documentation site showing installation instructions, working component examples, code snippets, and design guidelines
- Member of accessibility group, suggested improvements and shared insights

InvestCloud

Senior Designer

March 2021 - June 2022

- Created user flows and new responsive UIs for desktop, tablet, and mobile
- Designed UI mock-ups in Sketch using internal design system
- Created custom branded design systems for client projects

Advicent

Senior UX Developer

February 2020 - March 2021

UX Developer

May 2017 - February 2020

Associate UX Developer

April 2016 - May 2017

- Added and edited code in component library (HTML, SCSS, Angular)
- Maintained thorough documentation of component library with live examples, code snippets, use cases, implementation standards, and versioning
- Helped development teams across different projects, including writing new code, improving UI style, fixing bugs, and performing code reviews
- Performed accessibility tasks such as full audits, code reviews, design reviews, code improvements and logging outstanding issues

-
- Built UIs for new products, created mock-ups and sites for user testing
 - Performed manual accessibility audits on multiple products
 - Created accessibility roadmap to improve product compliance over time

-
- Developed UIs for multiple development teams across various products
 - Conceptualized and built a component library using Angular JS, continually expanded the library and eventually refactored to Angular 2+
